

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the application:

LISTING OF CLAIMS:

Claims 1-6 (cancelled)

7. (New) A plastic bag with a zipper on a inner surface of an upper opening portion of a bag body made of a plastic film, the zipper having a groove and a protrusion engaging with and disengaging from each other, wherein:

at least both sides of the bag body are fused or melted; and

the both sides of the bag body in the upper opening portion,

where both sides of the zipper are located, are not fused.

8. (New) A plastic bag with a zipper on an inner surface of an upper opening portion of a bag body made of a plastic film, the zipper having a groove and a protrusion engaging with and disengaging from each other, wherein:

at least both sides of the bag body are fused or melted; and

cut-offs are made at the both sides of the bag body in the upper

opening portion where the zipper is provided.

9. (New) A plastic bag according to claim 7 wherein at least one heat fusable plastic sheet is placed between a front film and a back film composing the bag body, so that a plural number of chambers are formed.

10. (New) A plastic bag according to claim 8, wherein at least one heat fusable plastic sheet is placed between a front film and a back film composing the bag body, so that a plural number of chambers are formed.

11. (New) A plastic bag according to claim 9, wherein the heat fusable plastic sheet is a non woven fabric or a foam plastic sheet.

12. (New) A plastic bag according to claim 10, wherein the heat fusable plastic sheet is a non woven fabric or a foam plastic sheet.

13. (New) A plastic bag according to claim 9, wherein when the upper opening portion of the bag body is opened, an end portion of the heat fusable plastic near the upper opening portion is located above the zipper.

14. (New) A plastic bag according to claim 10, wherein when the upper opening portion of the bag body is opened, an end portion of the heat fusable plastic near the upper opening portion is located above the zipper.

15. (New) A plastic bag according to claim 11, wherein when the upper opening portion of the bag body is opened, an end portion of the heat fusable plastic near the upper opening portion is located above the zipper.

16. (New) A plastic bag according to claim 12, wherein when the upper opening portion of the bag body is opened, an end portion of the heat fusible plastic near the upper opening portion is located above the zipper.

17, (New) A plastic bag according to claim 7, wherein a front film and a back film composing the bag body are fused together along a vertical line, so that a plural number of chambers are formed.

18. (New) A plastic bag according to claim 8, wherein a front film and a back film composing the bag body are fused together along a vertical line, so that a plural number of chambers are formed.
